Load Securement Airbags

Signode is a global industry leader and supplier of protective packaging. Signode has offered a full line of dunnage airbags and inflators for every mode of transportation under its Shippers Products brand for over 40 years. As a top supplier that provides variable material types, we are dedicated to creating the highest quality products to help reduce damage that occurs during the transportation cycle. We continue to introduce new and innovative products designed to meet the shipping needs of today and tomorrow.

Features and benefits

■ Dedicated to customer service

We offer complimentary load protection audits to assess the possible areas of improvement in terms of damage, cost savings and load protection. Our damage prevention specialists take time to understand your current operation and develop systems and processes to help improve your load securement.

■ Streamlining loading practices

Our Load Securement Specialists provide on-site user training and recommendations of the most optimal load protection products for your application.

■ Committed to excellence

Along with "built-in" quality, we have dedicated facilities and Statistical Process Controls (SPC) to help ensure our products meet your needs. This dedication to providing the highest quality products is evidenced by our ISO9001 certified Quality Management System.

■ Sustainability initiative assistance

We can help assist you with your protective packaging sustainability initiative. Our airbags are recyclable and can be deflated and reused for truck transport.
